

## Repair of Sidewalk on Bridge Street

Mr. George Brown of the City informed the MVCA that excavation for new sidewalks on the south side of Bridge Street between River Road and the Rideau River Bridge started on Tuesday morning 24th May.

The picture below was taken on sunny Wednesday afternoon and it shows a happy crew preparing the site for a gravel and stone-dust sub-base to be applied using the "stone slinger" truck shown in the picture followed by thoroughly consolidating the sub-base with tamping machines. The next steps are laying the cement base and preparing the wearing surface for the sidewalk and reinstating the roadway wherever cuts were made.

The new sidewalk will be in place in time for Dickinson Days!
